

**10 YEARS
product warranty!**

Certification and warranty:

- TÜV-certified in accordance with IEC 61215 Ed2, IEC 61730 including protection class II
- 25 year performance guarantee on 80% of actual power output
- 10 year performance guarantee on 90% of actual power output
- 10 years product warranty

Junction box

The junction box with integrated diodes by Tyco guarantees operating safety for the entire period of use.

Rear side foil

Combined with the EVA-foil the Dyneon/3M-rear side foil guarantees an excellent weather and aging protection.

Solar glass

The solar glass by Haniso especially stands out due to its high transparency and excellent mechanical properties.

Cells

As the core of the module the cells are especially important. Because of that we only rely on high-quality cells by renowned manufacturers like Neo Solar Power.

EVA-foil

Due to its high transparency the EVA-foil by Mitsui Chemicals yields excellent results, even under unfavourable light conditions. They feature highest adhesive values on glass and rear side foil, guaranteeing a long period of use.

Plugs and cables

Cables and plugs are usually the first indicators for the age of a photovoltaic system. Because of that Tyco only relies on high quality materials -- robust and weatherproof!

Frame

The 35 mm strong, double-walled hollow chamber frame ensures highest stability as well as an elegant design.
